FUTURE POTENTIAL INDEX | 2026

OF OECD COUNTRIES

CONCEPT, MEASUREMENTS AND RESULTS

FPI 2026

CURRENT RESEARCH PROJECT

Future Potential Index, 2026

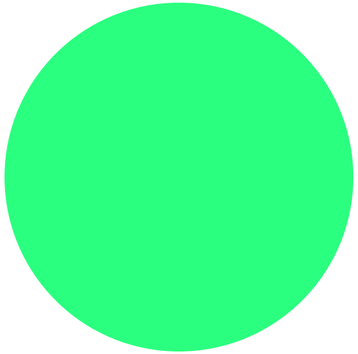

Future Potentials Observatory (2023–)

https://mome.hu/en/future-potentials-observatory

FUTURE POTENTIAL

The **holistic** concept of future potential (FP) expresses

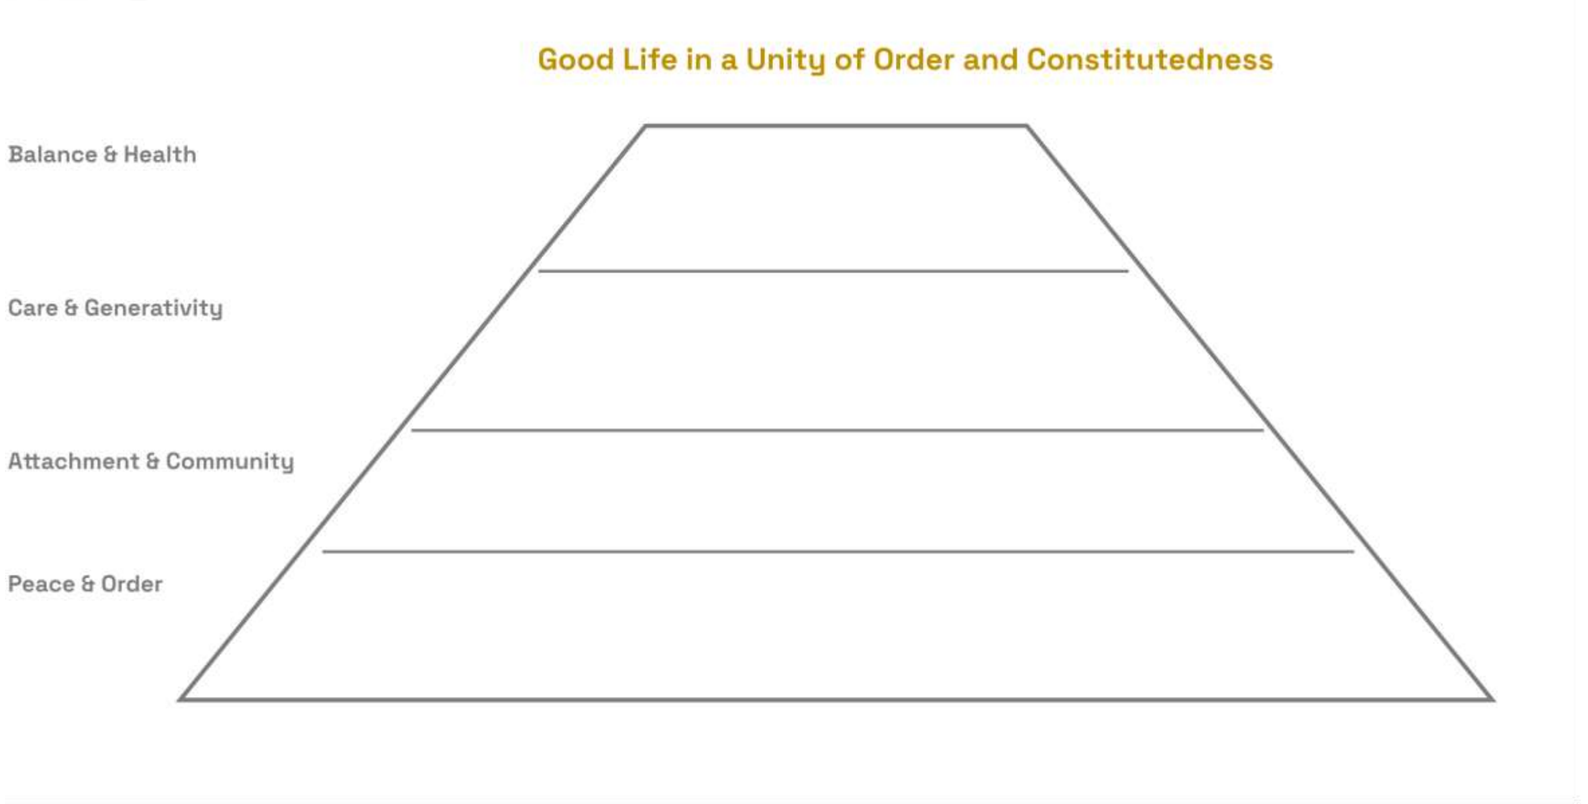

the **readiness of social entities**
— countries, cities, organizations and groups —
in terms of their ability **to preserve a good life**
for their members **in a unity of order** (constitutedness),
through the **strategic management** of future **change.**

NORMATIVE STANDARDS

The framework for a good life is conceptualized by four normative standards:

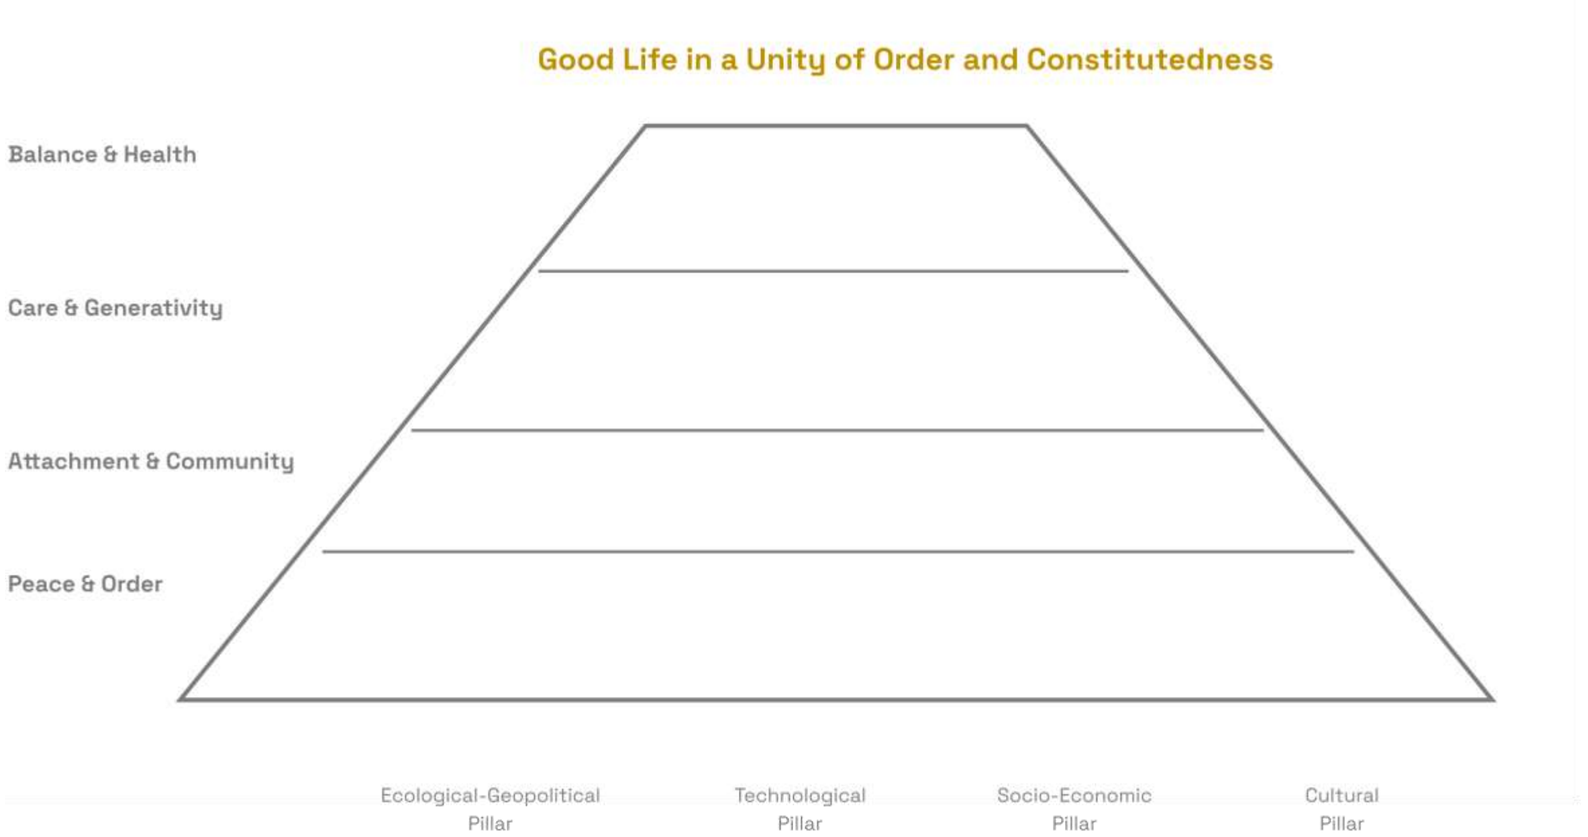

- **Balance & Health**
- **Care & Generativity**
- **Attachment & Community**
- **Peace & Order**

PILLARS

Four pillars describe the fields of functioning and future change:

- **Ecological-Geopolitical**
- **Technological**
- **Socio-Economic**
- **Cultural**

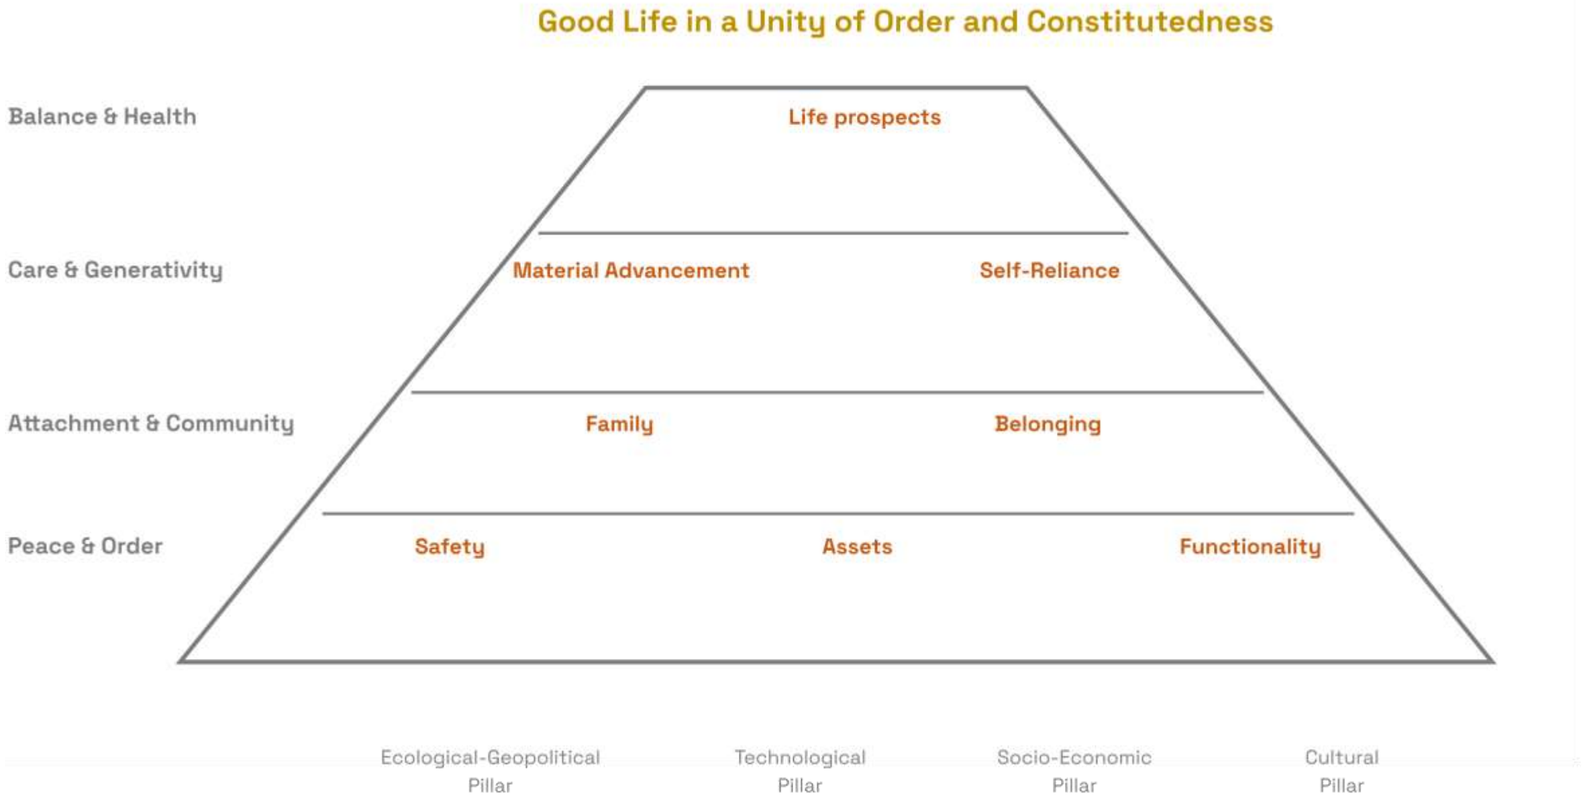

DIMENSIONS

Dimensions lie at the intersection of normative standards and pillars.

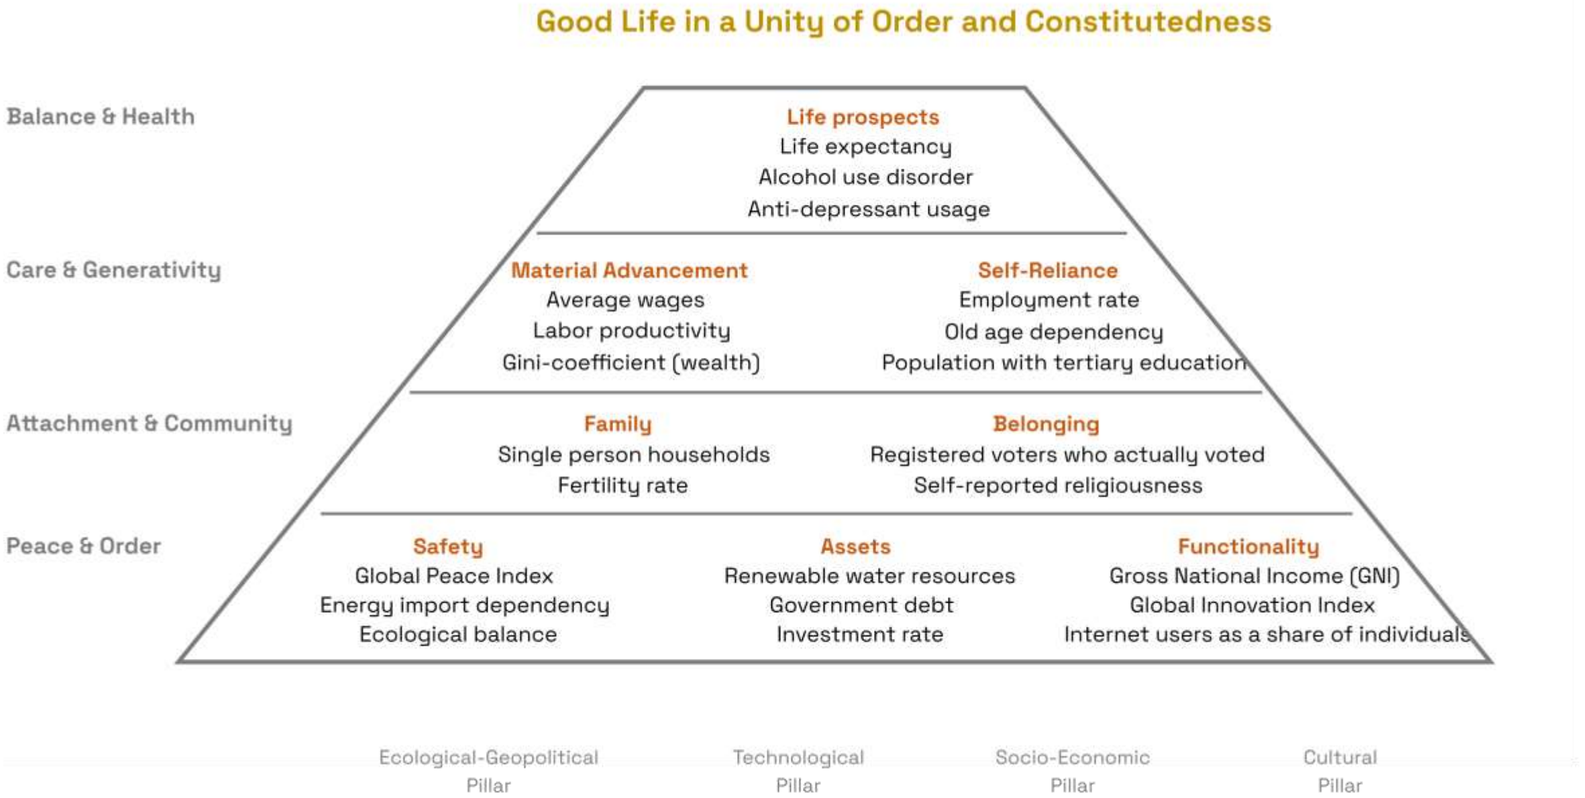

Of the sixteen possible intersections (4 normative standards × 4 pillars), the FPI focuses on eight essential dimensions. They describe human, environmental and instrumental phenomena, abilities and capacities, and operationalize the model.

- **Safety; Assets; Functionality;**
- **Family; Belonging;**
- **Material Advancement; Self-Reliance;**
- **Life Prospects**

STRUCTURE AND ELEMENTS OF THE FPI

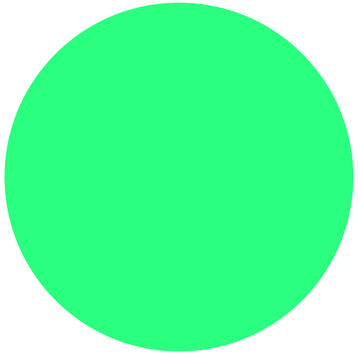

- 4 normative standards
- 4 pillars
- 8 dimensions
- 22 indicators

FUTURE POTENTIAL INDEX OF COUNTRIES

The degree of future potential of countries can be expressed with the Future Potential Index (FPI).

Its logic and composition derive from multidisciplinary theoretical foundations.

COMPARISON OF INDEX FRAMEWORKS

INDEX	FULL NAME	INDICATORS	DEVELOPED BY
BLI	Better Life Index	24	OECD
CRI	Change Readiness Index	30	KPMG
GRI	Global Resilience Index	12	FM Global
HDI	Human Development Index	3	United Nations
HPI	Happy Planet Index	4	New Economic Foundation
IDI	Inclusive Development Index	12	World Economic Forum
SDG	Sustainable Development Goals Index	84	United Nations
WHI	World Happiness Index	6	United Nations / SDSN
SFI	Social Futuring Index	28	Social Futuring Centre, Corvinus University
FPI	**Future Potential Index**	**22**	**Future Potentials Observatory, MOME Foundation**

METHODOLOGY

Indicators combine **normalized latest values** (0–100) and normalized absolute **changes** since 2010 (-50 to +50). The combined performance is normalized for aggregation.

Sub-indices are formed for dimensions and normative standards.

Normative-standard weights:

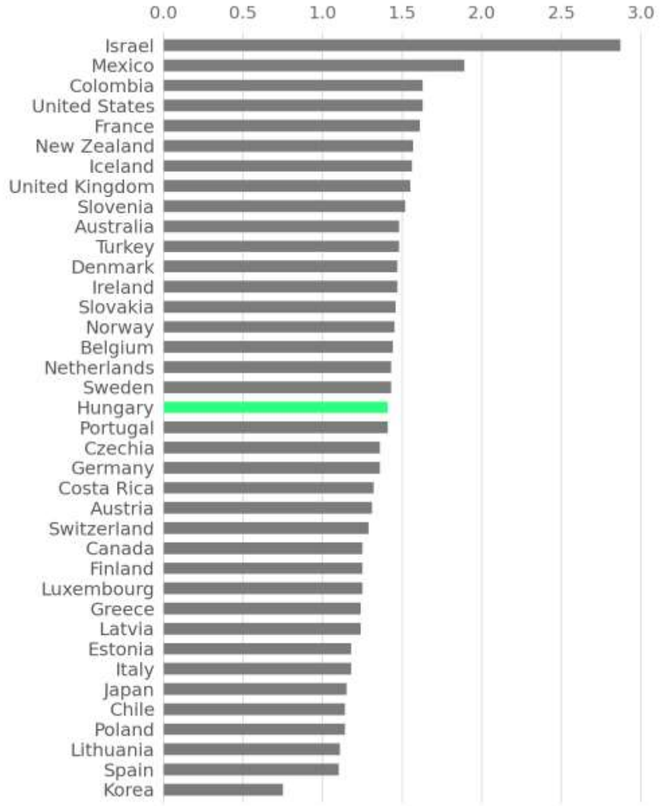

- Peace & Order **40%**,
- Attachment & Community **30%**,
- Care & Generativity **20%**,
- Balance & Health **10%**.

Other categories are equally weighted within their groups.
