

DÁVID CSÜRÖS obtained his MSc degree in Cognitive Neuroscience from the Budapest University of Technology and Economics. He worked as a Research Assistant at the Hungarian Academy of Sciences and as Lab Manager for the Social Mind and Body Group at Central European University. He is currently pursuing his PhD at the Doctoral School of MOME.

His primary research interest lies in the intersection of embodied cognition and design theory. As a member of the Design Futures research group at FPO, Dávid is exploring the confluence of digital culture and design, with a particular focus on artificial intelligence and generative design.
