

—

The most important value of Moholy-Nagy University of Art and Design (MOME) is its open mindset to the world in which respect for tradition, aspiration and promoting development all take part equally. Our mission is to find and provide answers to today's challenges with the tools of art and design, in cooperation with representatives of other fields.

The ambition of MOME is to become Central Europe's leading educational hub for innovation and art by 2030.

A unique and exciting opportunity has opened at MOME's Innovation Centre as

Material Research Hub Lead

Key responsibilities

- Manage and oversee material research activities at Innovation Centre
- Develop long-term material research strategy and set hub's priorities in line with the University's and Innovation Center's goals
- Plan, oversee and support research projects to ensure high quality research outputs
- Set up and manage an interdisciplinary research team
- Build international recognition of through regular publication of results, peer-reviewed publications, presentations at conferences or other appropriate events
- Advance internal research capacity and provide mentoring to material research projects across the University
- Develop the hub as a material research knowledge core for the whole University, including students and alumni
- Initiate and build active relationships with national & international partners, including external research networks and funding providers
- Proactively identify funding opportunities that reflect research areas and supports further research

—

■
