

MÁTÉ ZAVARKÓ is a researcher with expertise in strategic change management, corporate governance, clean energy innovation, and sustainable development. He obtained an MSc degree in Management and Leadership from Corvinus University of Budapest and earned a PhD degree in 2022 from the BCE Doctoral School of Business and Management, specializing in organization and management theory.

Focusing on organizational changes and innovation management, both in a general context and specifically within the energy sector, he has co-authored several journal articles and two books published by Akadémiai Kiadó. In addition to his research activities, he also manages corporate projects related to technological innovations, business development, and sustainability.
